

Achref TALBI

As a software engineer specializing in Mobile Development, I excel in crafting seamless user experiences and possess a strong background in UI/UX design. I am eager to take on challenging roles that allow me to apply my expertise and contribute to cutting-edge projects. My adaptability, teamwork, and leadership skills are key assets in shaping the future of technology

PROJECTS

Cross-platform Mobile Application (2023)

- Cross-platform mobile application named "TaskPulse" enables intuitive real-time task management, combining a seamless user experience with high security standards. My role has strengthened my skills in Full Stack development and project management
- Flutter, Node.js, MongoDB

DevOps (2022)

- Automate the continuous integration and deployment of a project developed with Spring Boot using a pipeline triggered with each code modification in GitHub.
- Jenkins, Docker, Log4j, JUnit, Sonar, Nexus, Prometheus et Grafana

Cross-platform Mobile Application (2022)

- Cross platform mobile application under the name "Rose" that allows users to control connected devices in their homes using voice assistants.
- Flutter, Node.js, MongoDB, raspberry pi 4, tensorflow

Android Mobile Application (2022)

- "ToyExchange" Android mobile application for parents who want to exchange other toys to satisfy their children who are no longer interested in their old toys. Instead of buying a new one, they can simply save money by exchanging with each other.
- Kotlin, Node.js, MongoDB.

iOS Mobile Application (Available on App Store) (2021)

- "ToyExchange TN" iOS mobile application for parents who want to exchange other toys to satisfy their children who are no longer interested in their old toys. Instead of buying a new one, they can simply save money by exchanging with each other.
- Swift, Node.js, MongoDB.

E-commerce Website(2019)

- E-commerce site for a pastry training center "La Dacquoise".
- HTML5, CSS, PHP, JavaScript, SQL.
